Further details

Heavy, perhaps thundery, downpours may become concentrated into a narrow corridor of persistent heavy rain on Saturday afternoon and evening.

Where this occurs, 20-30 mm rain may fall in an hour with 40-50 mm of rain in 3 or 4 hours, and a small chance of up to 80 mm in a few places. This brings a risk of localised flooding and disruption, whilst locations either side of this shower band may see very little rain.
